ABOUT THIS PLAN

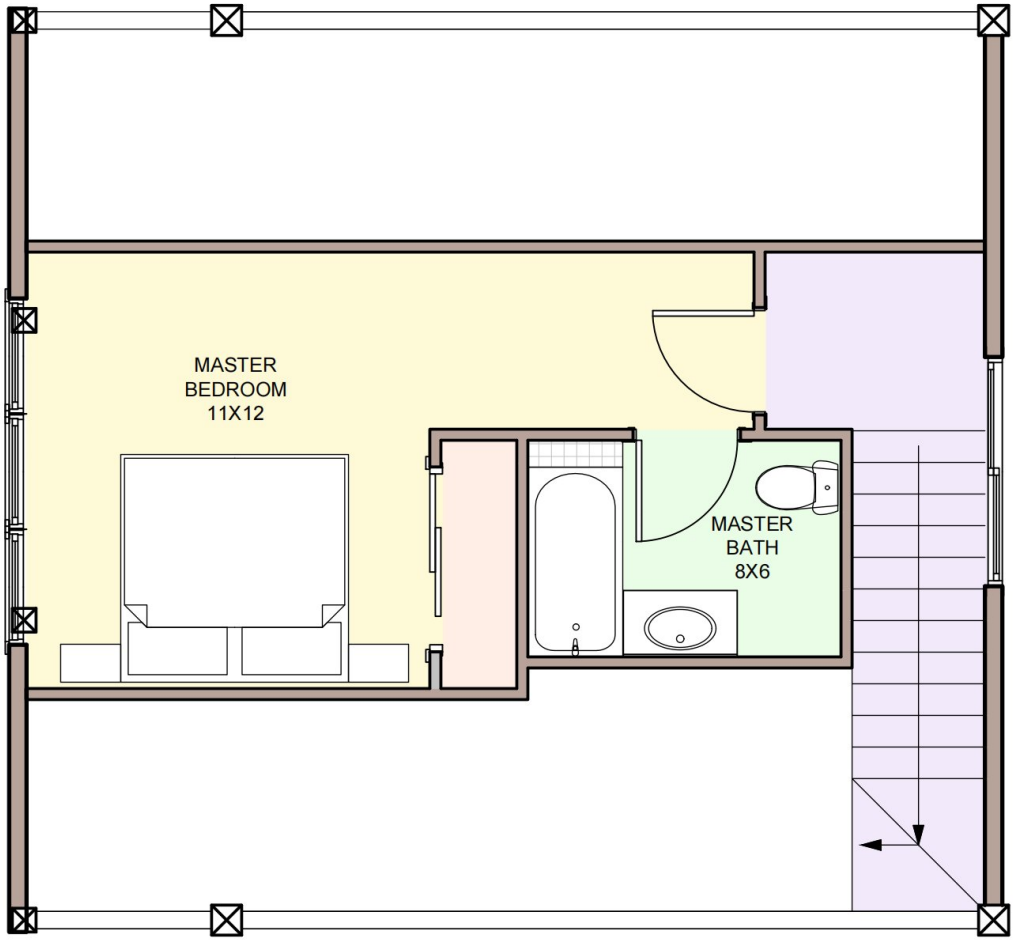

Welcome to your ultimate sanctuary. The ADU750-2ST isn't just a floor plan; it's a breathtaking statement of rugged luxury and architectural genius. We took the warm, timeless embrace of a hand-hewn mountain lodge and engineered it to outsmart the system using our groundbreaking SmartBuild Bonus SystemTM.

By utilizing a dramatic 12:12 roof pitch, we captured "hidden equity" right under the rafters, packing a full 2-bedroom, 2-bathroom estate into a hyper-efficient 492-square-foot ground footprint. The main floor boasts a sweeping great room and country kitchen, while the upper level transforms into an exclusive master suite tucked away in the sky. Whether you are building an unforgettable, highly profitable Airbnb getaway, a secluded cabin in the woods, or maximizing your property value with a premium log ADU, this design delivers massive emotional impact without sacrificing an inch of your lifestyle. Turn your land into a legacy.

Main Floor — 492 sq ft

Loft — 258 sq ft
