

Monitor Garage

Framed / Barn / Garage / ADU

Bedrooms	0
Bathrooms	0
Stories	2
Main floor	864 sq ft
Loft	288 sq ft
Basement area	Not specified
Total area	1,152 sq ft
Garage	Yes
Basement	No

The Monitor Garage by Sierra Log & Timber is a practical 1,152 sq ft framed cabin with a straightforward spirit and room to grow. The loft could be built out thus creating an ADU style of home. Ideal for hobbyists, car enthusiasts, or anyone dreaming of a flexible workshop and retreat, this two-story plan centers around an 864 sq ft main level that's ready for tools, gear, or creative projects. Upstairs, a 288 sq ft loft offers adaptable space for a studio, office, or even a cozy bunk area for weekend stays. With its generous garage and open layout, the Monitor Garage is well-suited as a Adu, workshop, guest quarters, or a basecamp for outdoor adventures. Like all our plans, it can be tailored to fit your vision, blending utility with the warmth of handcrafted timber style.
